(Note that the values given are typical for each grain type. You should check each sample with a weight bulk measuring device, condometre, if high accuracy is important).

- 1 hectolitre of wheat weighs 77 kilograms on average.
- 13 hectolitres of wheat weighs 1 tonne on average.

ANGLE OF RESPONSE FOR COMMON GRAINS

GRAIN	ANGLE	GRAIN	ANGLE
Barley	28°	Safflower	25°
Wheat	27°	Sorghum	30°
Linseed	22°	Sunflower	30°
